AviClear[®]

The Future of Clear Skin

CUTERA[®]
A New Energy in Aesthetics

The Latest in *Acne Innovation*

AviClear is the revolutionary
and award-winning laser technology
for the treatment of mild,
moderate and severe acne.

Renew skin with AviClear

AviClear transcends traditional approaches by selectively targeting the source of acne at the optimal wavelength and power, safe for all skin types and skin tones. AviClear isn't just a routine, it's a transformative experience that redefines the standard for long-term acne clearance, in just three, 30-minute treatment sessions.

✓ Chemical free

✓ 3 easy treatments

✓ Long-lasting results

✓ TGA approved

How does *AviClear work?*

AviClear uses the power of light to target acne at the source. This laser treatment uses a 1726-nm wavelength to selectively target and down regulate the sebaceous glands. The overproduction of sebum by the sebaceous glands is one of the leading causes of acne.

How many treatments are recommended?

The AviClear treatment protocols recommend three, 30-minute treatment sessions spaced one month apart to achieve optimal results.

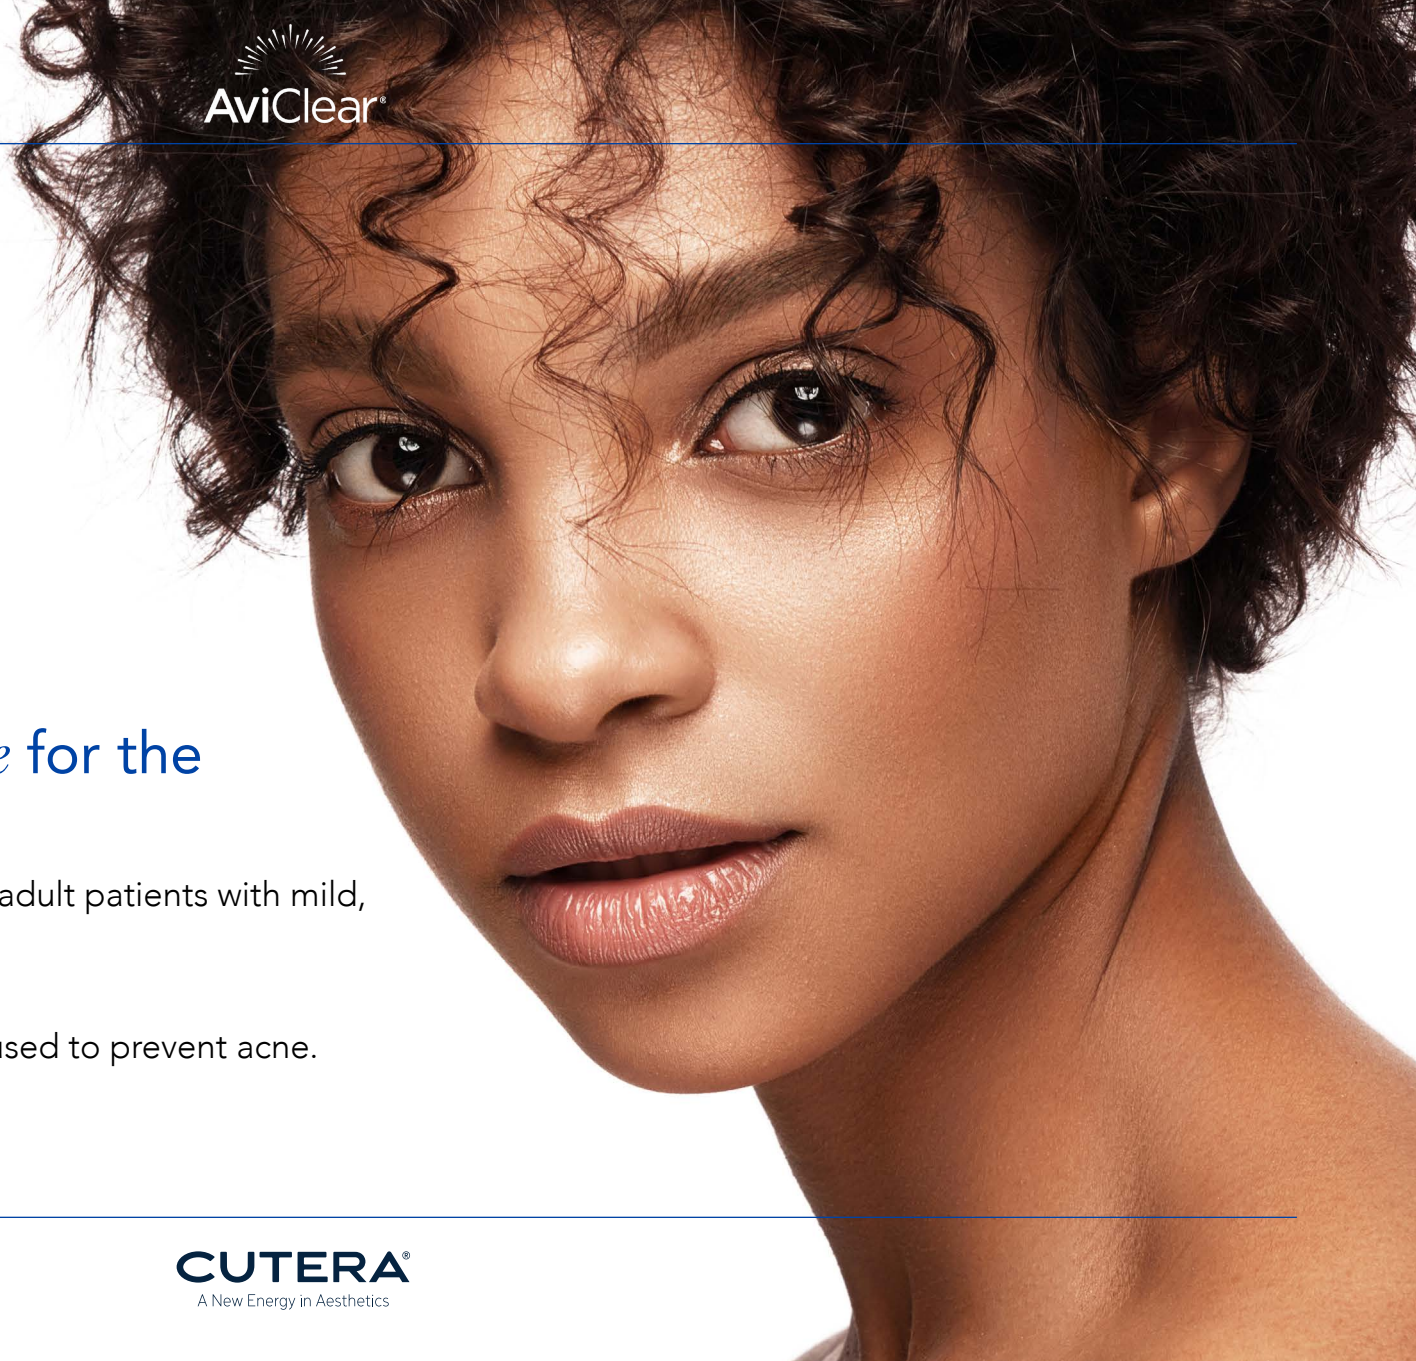

AviClear *helps* to treat:

- ✓ Mild Acne
- ✓ Moderate Acne
- ✓ Severe Acne

Who is a *good candidate* for the AviClear treatment?

AviClear is suitable for adolescents and adult patients with mild, moderate or severe acne.

AviClear is not a treatment that can be used to prevent acne.

The *features* of AviClear

THE BENEFIT

Significantly eliminates acne in three, quick 30-minute treatment sessions without downtime.

SAFE

AviClear is enhanced with AviCool™ sapphire skin cooling and smart sensors to maximize patient comfort and safety and maintain skin's temperature for an optimal and safe treatment experience.

KEY POINTS

The first and original TGA-cleared energy device for the treatment of mild to severe acne.

Eliminates acne at the source without the need for prescription medications.

ONE OF A KIND

An award-winning acne treatment technology.

A New Energy in Aesthetics

AVICLEAR PROVIDER WEBSITE COPY

With over 12,000 commercial treatments performed, AviClear is the number one TGA-cleared energy-based acne treatment. (PROVIDER) is excited to introduce AviClear. AviClear transcends traditional approaches by selectively targeting the source of acne at the optimal wavelength and power, safe for all skin types and skin tones. AviClear isn't just a routine, it's a transformative experience that redefines the standard for long-term acne clearance.

WHAT IS AVICLEAR?
AviClear is a laser treatment that can effectively treat all acne severities. Its revolutionary and award-winning technology is safe for all skin types and skin tones.

HOW DOES AVICLEAR WORK?
AviClear uses the power of light to target acne at the source. This laser treatment uses a 1726-nm wavelength to selectively target and down regulate the sebaceous glands. The overproduction of sebum by the sebaceous glands is one of the leading causes of acne.

HOW MANY TREATMENTS ARE RECOMMENDED?
The AviClear treatment protocols recommend three, 30-minute treatment sessions spaced one month apart to achieve optimal results.

WHEN CAN RESULTS BE SEEN?*
The timing of when visible improvements can be noticed will vary by patient. In a clinical study of 104 patients who received a series of three AviClear treatments, it was observed that 89 % of patients had at least half of their acne resolved after three months after their final treatment. At six and twelve months after the final treatment, this figure rose to 87% and then to 92%.
